

Bug Report

Bug Title

Clicking browser back arrow shows "Session Expired" instead of navigating to previous page

Module

Account Setup / Navigation

Environment

- Application: KrispCall Account Setup
- URL: <https://app.krispcall.com/account-setup-guide>
- Browser: Chrome Latest
- OS: Windows 11

Preconditions

User is logged in and navigating through the account setup flow.

Steps to Reproduce

1. Open the KrispCall account setup page.
2. Proceed to the next step in the setup flow.
3. Click the browser back button (top-left browser arrow).
4. Observe the behavior.

Actual Result

The application displays a "Session Expired" message/page when clicking the browser back button.

Expected Result

The user should be navigated back to the previous page/step without showing a session expired message, provided the session is still active.

Impact

Users may think they have been logged out unexpectedly, causing confusion and interruption in the onboarding flow.

Severity

Medium

Priority
