

Bug Report

Bug Title

Expiry date field accepts 2-digit year instead of required 4-digit year format

Module

Payment / Card Details

Environment

- Browser: Chrome Latest
- OS: Windows 11
- URL: <https://app.krispcall.com/account-setup-guide>

Preconditions

User is on the payment/card details page.

Steps to Reproduce

1. Open the payment/card form.
2. Navigate to the expiry date field.
3. Enter expiry date in MM/YY format (example: 12/28).
4. Submit the form.

Actual Result

The system accepts a 2-digit year format (MM/YY).

Expected Result

The system should accept only a 4-digit year format if the requirement is MM/YYYY. Example:

- Valid: 12/2028
- Invalid: 12/28
